NotesLinks

Please edit system and help pages
ONLY in the master wiki!

For more information, please see
MoinMoin:MoinDev/Translation.

```
##master-page: ##master-date: #acl -All:write Default #format wiki #language en = Notes  
Linking =
```

== Versions and Enabling ==

Notes linking is enabled in 1.6.3 and 1.7. For older releases follow the instructions in
HelpOnConfiguration for "url_schemas". Add the word "`notes`" in lowercase to the schemas.

== Creating Notes Links ==

- In Notes, select the document and open document properties
{{attachment:docprop.jpg}}
- On the tab: <+>, there is an identifier field
- Copy the contents of the identifier field to the clipboard.
- Paste the contents into the wikipage

```
{{{  
Notes://GunganCen/CA256992000B94BF/BC4B9A3C3F7C5458CA256A6C001A64F1/B0558F2B9DDB  
41C3CA25741900006827 }}}}
```

- You can do the normal linking markup for example, add some square brackets and some
override text: {{{
[[Notes://GunganCen/CA256992000B94BF/BC4B9A3C3F7C5458CA256A6C001A64F1/B055
8F2B9DDB41C3CA25741900006827 | TA Branch Meeting]] }}}}
- It is best practice to remove the server name. This means that if the server name
changes, or the content moves to another server, the link should still work. When you
remove the server name ensure that there are 3 forward-slashes between "Notes:" and

the replica ID {{{

```
[[Notes:///CA256992000B94BF/BC4B9A3C3F7C5458CA256A6C001A64F1/B0558F2B9DDB41C3CA25741900006827]] ]}}
```

- Change "Notes:", at the beginning of the line to lowercase. MoinMoin will only recognise it as a link if it is lowercase:

```
{{{  
[[notes:///CA256992000B94BF/BC4B9A3C3F7C5458CA256A6C001A64F1/B0558F2B9DDB41C3CA25741900006827 | TA Branch Meeting]] ]}}
```
