

06 Your own wiki homepage

Please edit system and help pages
ONLY in the master wiki!

For more information, please see
MoinMoin:MoinDev/Translation.

page was renamed from
WikiCourse/06 The own homepage
in the wiki

`##master-page: ##master-date: #acl -All:write Default #format wiki #language en #pragma section-numbers off <<Navigation(slides)>> = Your own wiki homepage = After creating an account you can see your own name in the navigation area, which is linked to a page of the same title: your personal homepage!`

If you click on this link, you can see one of the unique characteristics of wikis for the first time: instead of getting a "[[RFC:2616|404 not found]]" error when a non-existent page is called, the wiki helps you create the page.

After following the instructions displayed, the wiki will display a template of your own homepage in a form.

You can change this template, give an optional comment, and then save the page by clicking "`<<GetText(Save Changes)>>`".

Version #1
