The simplest way to enter text into a wiki is similar to doing so in a word processor.

You just start writing. :)

The only anomaly is that you have to hit "enter" "twice" for a paragraph:

```
== Input in the editor form == {{{ First paragraph. Still first paragraph.
```

```
Second paragraph.
```

```
Third paragraph. }}}
```

```
== Display ==
```

First paragraph. Still first paragraph.

Second paragraph.

Third paragraph. = Dividing rules
= == Input == {{{ First part.

Second part. }}}}

== Display ==

First part.

Second part.
