##master-page: ##master-date: #acl -All:write Default #format wiki #language en #pragma section-numbers off <<Navigation(slides)>> = Creating more pages = The easiest and best way to create more pages is to:

- think of a "good" page name.
- edit an appropriate page, add a link to the new page, and save it.
- click on the link to the new page
- prepare to edit using:
 - an empty page.
 - a page template (a list of templates is displayed on the left).
 - (!) the list of similar page names shown to ensure that there isn't any slightly different named page on the same topic.
- start editing, fill the page with content, and save it.

(!) This method makes sure that new pages are always accessible from links on already existing pages.
