

UserPreferences

Please edit system and help pages
ONLY in the master wiki!

For more information, please see
MoinMoin:MoinDev/Translation.

##master-page:Unknown-Page ##master-date:Unknown-Date #acl -All:write Default #format wiki
#language en = User Preferences = You can predefine, disable or remove several options on the
user preferences page using the following parameters in your wiki config:

```
||<tablewidth="100%"rowbgcolor="#ffffcc"25%>""Variable"" ||""Default"" ||""Description"" || ||
user_checkbox_defaults || dict || Sets the default settings of the user preferences checkboxes.
Example: user_checkbox_defaults = {'edit_on_doubleclick': 0} || || user_checkbox_disable || [] || a
list of checkbox names to be disabled in the user preferences. A disabled checkbox is displayed
greyedout and uses the default value set in user_checkbox_defaults. || || user_checkbox_fields ||
[...] || list of checkbox items. || || user_checkbox_remove || [] || a list of checkbox names to be
removed from the user preferences. A removed checkbox uses the default value set in
user_checkbox_defaults. || || user_form_defaults|| [] || a list of form defaults for user preferences.||
|| user_form_disable || [] || a list of form field names to be disabled in the user preferences. A
disabled field is displayed greyed out and uses the default value set in user_form_defaults.|| ||
user_form_fields || [...] || list of user preferences form items. || || user_form_remove || [] || a list
of form field names to be removed from user preferences. A removed form field uses the default
value set in user_form_defaults.||
```

The possible keys / clear text explanations are found in [MoinMoin/config/multiconfig.py](#):

```
||<tablewidth="100%"rowbgcolor="#ffffcc"25%>""Variable"" ||""Description"" || || mailto_author ||
Publish my email (not my wiki homepage) in author info || || edit_on_doubleclick || Open editor on
double click || || remember_last_visit || After login, jump to last visited page || || show_comments ||
Show comment sections || || show_nonexist_qm || Show question mark for non-existing pagelinks ||
|| show_page_trail || Show page trail || || show_toolbar || Show icon toolbar || || show_topbottom ||
```

Show top/bottom links in headings || || show_fancy_diff ||Show fancy diffs || || wikiname_add_spaces
|| Add spaces to displayed wiki names || || remember_me || Remember login information || ||
want_trivial || Subscribe to trivial changes || || disabled || Disable this account forever ||

So you could do, for example:

```
user_checkbox_remove = ['edit_on_doubleclick', 'show_nonexist_qm', 'show_toolbar',  
'show_topbottom', 'show_fancy_diff', 'wikiname_add_spaces', 'remember_me', 'disabled',]
```

```
user_form_remove = ['password', 'password2', 'css_url', 'logout', 'create', 'account_sendmail',  
'aliasname',]
```
